PROFESSIONAL SUMMARY

Senior DevOps Engineer with 6+ years of experience driving scalable Azure infrastructure, automating deployments with Terraform and CI/CD, and enabling containerized applications using Docker and Kubernetes in high-availability environments.

CORE SKILLS

Cloud Architecture & DevOps: Azure, CI/CD, Azure DevOps
Infrastructure as Code: Terraform
Containers & Orchestration: Docker, Kubernetes
Version Control: Git, GitHub
Scripting: YAML, Python
Monitoring: Azure Monitor, Application Insights, Prometheus, Grafana

PROFESSIONAL EXPERIENCE

BDO | Senior Consultant Dec 2025 – Present

Working as a DevOps Engineer on the “Global Portal” platform, a multi-tenant client collaboration solution enabling secure B2B communication across global member firms using Azure and Microsoft 365 services.

Key Achievements:

- Automated Azure infrastructure using **Terraform (IaC)**, reducing manual effort by 70% and ensuring consistent, repeatable deployments
 - Designed and implemented **high-availability, multi-region architecture** using Azure Traffic Manager, achieving **99.9%+ uptime**
 - Built and optimized **end-to-end CI/CD pipelines**, reducing deployment time by **50%** and improving release reliability
 - Implemented **event-driven architecture** using **Azure Service Bus** and **Event Grid** to enable scalable, asynchronous processing
 - Optimized application performance using **Azure Redis Cache and CDN**, improving response time by **30%**
 - Implemented **monitoring and observability** using **Azure Monitor, Application Insights, Prometheus** and **Grafana** Dashboards
-

IGT Solutions | DevOps Engineer / Senior Support Engineer Dec 2021 – Nov 2025

Working as part of the DevOps team for the “FlightOps” project, collaborating with cross-functional teams to automate infrastructure, streamline deployments, and enhance system reliability.

Key Achievements:

- Automated infrastructure provisioning using Terraform (IaC) across Azure environments, ensuring scalable deployments
 - Built and optimized CI/CD pipelines, reducing release cycle time by 50% and improving deployment reliability
 - Containerized applications using Docker, improving deployment consistency across environments
 - Managed source control and branching strategies using Git and Azure DevOps
 - Improved system uptime and reduced production incidents by 30% through proactive monitoring and issue resolution
-

Future Focus Infotech | Support Engineer Mar 2020- Nov 2021

- Provided L2 support for Azure infrastructure (VMs, VNets, NSGs), ensuring system stability and availability
 - Assisted in provisioning cloud resources using Terraform (IaC) for consistent environment setup
 - Supported CI/CD pipelines in Azure DevOps, handling build and release configurations
 - Monitored and troubleshooted applications using Azure Monitor and Application Insights, reducing incident resolution time
 - Supported system administration and virtualization tasks, including VM provisioning, patching, and performance monitoring
-

Renovision Automation | Desktop Support Engineer Oct 2017 – Mar 2020

- Provided desktop and end-user support, troubleshooting hardware, software, and network issues for smooth day-to-day operations
 - Installed, configured, and maintained Windows systems, applications, and user accounts
 - Assisted in managing Active Directory (AAD) for user provisioning, password resets, and access management
 - Monitored and supported virtual machines and basic Azure resources, escalating complex issues to senior teams
 - Performed system patching, updates, and basic system administration tasks to ensure system security and performance
 - Supported VMware environment (vSphere) for basic monitoring, VM operations, and issue handling
-

EDUCATION

BE, Computer Science | RGPV University | 2013-2017 | Secured 1st Division
